Description

Deprecated IPP functions used in Img class

.../ICLCore/src/Img.cpp

warning: "IppStatus ippiResize_8u_C1R(...)" is deprecated

warning: "IppStatus ippiResize_32f_C1R(...)" is deprecated

IPP documentation:

- Deprecated function ippiResize_<mod>
http://software.intel.com/sites/products/documentation/hpc/ipp/ippi/ippi_ch12/funcn_Resize.html
- New function "ippiResizeSqrPixel_<mod>"
http://software.intel.com/sites/products/documentation/hpc/ipp/ippi/ippi_ch12/funcn_ResizeSqrPixel.html

New function also provides multi-thread support and image shifting, but requires an additional buffer. Multi-thread is only efficient for big images.
