

XTT - eXtensible Task Toolkit - Bug #137

eventbus-rsb cannot handle scope /

2013-01-10 13:19 - Maikel Linke

Status:	New	Start date:	2013-01-10
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	eventbus	Estimated time:	0.00 hour
Target version:			
Description			
When submitting a task on scope / the following message occurs:			
INFO: Creating new task submission for de.unibi.agai.xtt.eb.rsb.RSBTaskClientBus@1a5ee81			
Exception in thread "main" java.lang.ArrayIndexOutOfBoundsException: -1			
at java.util.ArrayList.elementData(ArrayList.java:371)			
at java.util.ArrayList.get(ArrayList.java:384)			
at de.unibi.agai.xtt.eb.rsb.RSBBaseBus.taskNameFromScope(RSBBaseBus.java:230)			
at de.unibi.agai.xtt.eb.rsb.RSBTaskClientBus.send(RSBTaskClientBus.java:34)			
at de.unibi.agai.xtt.client.TaskSubmissionService.submit(TaskSubmissionService.java:85)			
at de.unibi.agai.tasksubmitter.TaskSubmitter.main(TaskSubmitter.java:47)			
Using XTT version 3.2.6.
