Cognitive Interaction Toolkit - Support #246

Does "extra-requires" and "extra-provides" create according jobs?

Description

As an Example I'd like to choose the fsmt.project. This project requires "setuptools", "pyscxml" --- which
is in return provides "setuptools", "pyscxml" see:

http://opensource.cit-ec.de/projects/citk/repository/changes/projects/fsmt.project?rev=master
http://opensource.cit-ec.de/projects/citk/repository/changes/projects/pyscxml.project?rev=master

When creating jobs, using the build-generator (fsmt is referenced in the oncilla-sim-0.2 distro), a
pyscxml job is *not* created automatically. I cannot recall if this has been the case at some point.
For now, I added pyscxml to the distro. Can anyone comment, test this?

History

#1 - 2014-05-14 13:22 - Florian Lier

- Subject changed from Does "extra-requires" and "extra-provides" create accroding jobs? to Does "extra-requires" and "extra-provides" create according jobs?

#2 - 2014-05-14 14:56 - Jan Moringen

This kind of job creation for the dependency closure does not happen automatically. However, an error should be displayed if an upstream project is not part of the distribution.

#3 - 2014-05-14 14:58 - Florian Lier

- Status changed from New to Closed

Thanks for clarification!
