Description			
When building the rsb-scxml-engine from the current recipe source:projects/rsb-scxml-engine.project it fails due to dependency issues:			
mvn -Dtag=2014-11-21_12-20-45 -Dlabel=master -DskipTests=true -DaltDeploymentRepository=toolkit::default::file:///homes/anordman/dev/euroc/prefix/nightly//share/repository -Dmaven.repo.local=/homes/anordman/.m2/repo-toolkit-nightly

It seems that there are two protobuf version conflicting (2.4.1, 2.5.0). I am deploying in a brand new prefix so that there should not be any pollution from previous precise deployments.			
I am reporting this here, since it seems to be a dependency and/or configuration issue. Any ideas/hints?
