Target version:		**Spent time:**	5.00 hours

Description

Let the BRIX2 [1] modules talk with the AMiRo for sensor/actor enhancement.

It is done by adding the usb_cdc_acm driver by commit commit:96c83d37.
The BRIX2 module needs to be plugged in at start-up time, so that it appears as /dev/ttyACM0 device.
One can test the BRIX2 module by typing in cat /dev/ttyACM0
