

IPAACA - Feature #469

Feature # 466 (New): IPAACA v3

v3: Thread-safe iterators

2016-02-18 14:06 - Ramin Yaghoubzadeh

Target version:			

Description

Iterating over a Payload object (any extended access in fact) may fail due to the Payload being updated remotely. There should be a mechanism to perform such extended access / iterations in a thread-safe manner, instead of the necessity to clone the Payload into a dict.
