<b>Target version:</b>	
<b>Description</b> Moving the makefile system currently used for the iclProjects to an subproject with a separate svn-repro would have two advantages: <ol style="list-style-type: none"><li>1. it would be usable without the ICL installed</li><li>2. it would be possible to use 'svn up' to benefit from newer versions of the makefile in already existing projects</li></ol>
