Image Component Library - Feature #6

Outsource the iclProject Makefile system

2010-08-20 11:56 - Erik Weitnauer

Target version:			

Description

Moving the makefile system currently used for the iclProjects to an subproject with a separate svn-repro would have two advantages:

1. it would be usable without the ICL installed
2. it would be possible to use 'svn up' to benefit from newer versions of the makefile in already existing projects
