### History

#### #1 - 2012-08-29 11:42 - Christof Elbrechter

- new Idea: we'll just integrate the sources of a current version of the libgtest into our source tree.
- By now, we dont need an automated CMake-driven update mechanism for this
- If our included GTEST library becomes too old, we can just replace it with a newer one manually
- By theses means, we avoid having to download gtest-tarballs with every build or something
