Description			
<p>The class seems to be very old. In particular, it uses it's only vector class, which could easily be replaced by a DynMatrix typedef. Additionally, it comes up with 2 extra headers, which we could get rid of by adding internal classes. This would also make the VQ2D class more self-contained.</p> <ul style="list-style-type: none">• also todo: write a small gui-based demo application for this
